PUBLIC MEETING SUMMARY

RAYMONDVILLE DRAIN PROJECT
PUBLIC MEETING SUMMARY REPORT

**Pop-up Meeting
Locations & Dates:**

St. Patrick's Catholic Church
11833 FM 1015, Lasara, TX 78561
July 25, 2023 | 4:00 pm – 6:00 pm

Sgt. Jacob de la Garza Park North
1059 Cullen Street, Edinburg, TX 78541
July 26, 2023 | 11:00 am – 1:00 pm

Across from P&L Service Grocery and Convenience Store
Intersection of FM 490 & FM 493, Hargill, TX 78549
July 26, 2023 | 4:00 pm – 6:00 pm

R2 Country Store
14310 9th Avenue, San Perlita, TX 78590
July 27, 2023 | 11:00 am – 1:00 pm

Veterans Park
901 W. Durango Avenue, Raymondville, TX 78580
July 27, 2023 | 4:00 pm – 6:00 pm

Pop-up Meeting Purpose:

The purpose of the community outreach pop-up meetings (pop-up events) was to convey information on the proposed drainage system improvement project and solicit comments on the proposed project from the public (see Attachment B). The proposed Raymondville Drain Project (RDP) would construct new storage channels, ditches and detention pond facilities and widen select segments of existing channels and ditches to provide flood mitigation benefits within low-lying areas of Hidalgo and Willacy Counties. The RDP would be designed as a modern drainage system to provide additional regional drainage capacity in flood-prone and poorly drained areas; reduce flood-related damage to residential, commercial, and agricultural areas (particularly following significant rainfall or storm events); and support economic development opportunities in urban and rural areas within Hidalgo and Willacy Counties.

Pop-up Meeting Format:

The pop-up events were conducted in a format in which members of the public could arrive and depart at their convenience and take informational materials with them. Each pop-up event was held at a tent which covered tables that displayed exhibit boards and other project information, including handouts.

RAYMONDVILLE DRAIN PROJECT
PUBLIC MEETING SUMMARY REPORT

Attendance:

Pop-up Meeting Attendance	
Pop-up Meeting Location	Attendees
Lasara, TX July 25, 2023: 4:00 pm – 6:00 pm	15 citizens 1 elected official 3 project staff
Edinburg, TX June 26, 2023 11:00 am – 1:00 pm	1 citizen 0 elected officials 4 project staff
Hargill, TX June 26, 2023 4:00 pm – 6:00 pm	6 citizens 0 elected officials 2 project staff
San Perlita, TX June 27, 2023 11:00 am – 1:00 pm	4 citizens 1 elected official 2 project staff
Raymondville, TX June 27, 2023 4:00 pm – 6:00 pm	3 citizens 0 elected officials 2 project staff
Total Attendees	29 citizens 2 elected officials

Notices:

A Notice of Public Meeting was published in *The Raymondville Chronicle* on July 19, 2023, *The Monitor* and *The Mercedes Enterprise* on July 19, 2023, and in *El Extra*, a Spanish-language newspaper, on July 21, 2023. The Notices were published in English and Spanish. A second Notice of Public Meeting was published which consisted of a flyer distributed via Facebook and local bulletin boards.

On July 26, 2023, the flyer was made available in both English and Spanish on the City of Raymondville's website. On July 21, 2023, it was published on the City of Edinburg's Facebook page. On July 24 and 27, 2023, it was posted to the City of San Perlita's Facebook page. Additional copies of the flyer were distributed at St. Patrick's Church in Lasara, before Saturday and Sunday mass on July 22 and 23, 2023, and were displayed on the church's bulletin wall. Another copy of the flyer was posted on the front door of the R2 Country Store in San Perlita (see Attachment C).

Public Meeting Summary:

A total of 5 pop-up events were conducted in Lasara, Edinburg, Hargill, San Perlita, and Raymondville. The pop-up events took place in between July 25 and July 27, 2023. A total of 29 members of the public and 2 elected officials attended the pop-up meetings. Directional signs were placed along main roads located near the pop-up events to aid in directing members of the public to the pop-up event locations. Exhibit boards

displayed at the pop-up events presented a project location map, the project typical section, and the purpose and need. Members of the public who attended the pop-up events were asked to sign in (see Attachment D). Attendees were provided a project information sheet and a pre-stamped comment/survey form. The information sheet provided a description of the proposed project, the purpose of and need for the project, and instructions on how to comment on the project. The comment/survey form asked for information from the public on how their property is affected by flooding, how often their property is flooded, flood damage in the area near their property, flooding conditions along roads near their property, and if they have flood insurance or have ever received aid after a flooding event. Members of the public were encouraged to fill out the comment/survey form in person or take them home and mail them back to the RRP Consulting Engineers office in McAllen, Texas (see Attachment E). Members of the public were also encouraged to take additional information sheets and comment/survey forms and distribute them amongst their friends, family, or neighbors. Members of the RDP project delivery team were in attendance to answer any questions or explain project details in English or Spanish. All exhibit boards and information sheets were available in English and Spanish. Comment/survey forms were bilingual documents which included text in both English and Spanish (see Attachment F).

Post-Public Meeting Events:

A total of 3 comments on the RDP were received during the pop-up events and the comment period which followed. A total of 2 comment/survey forms were completed and submitted in-person at the pop-up events. One completed comment/survey form expressed support for the project. The other completed comment/survey form expressed concerns regarding the land compensation rates and the potential relocation of wind turbines; the commenter additionally requested a meeting with HCDD1 and environmental regulatory agencies. During the initial 21-day comment period which followed the first pop-up event in Lasara, 1 comment was written on the City of San Perlita's Facebook post which displayed the flyer; the comment expressed support for the project. The comment period was extended from Tuesday, August 15 to Friday, August 18 to allow the public a greater opportunity to provide feedback; however, following the pop-up events, no additional comments or comment/survey forms were received via mail or email.

Public Meeting Comment
& Response Report

Area of Concern	Commenter Name	Comments	PDT Response	Event Attended	Format of Comment
General Project	Rolando Velasquez	If this project is for the betterment of the community then we must do what is necessary to improve to prevent from flooding.	Comment acknowledged.	Lasara	In-Person
Easement Payment, Wind Turbines	Dale Rhodes	Easements need to be paid at the same price as you are paying in Hidalgo County. What are we doing about the wind turbines? You are just going to move them onto someone else's property that don't want them. I would like to request a meeting w/ Hidalgo County DD#1, USFWS, TPWD.	The RDP will comply with all applicable Federal standards and regulations for the acquisition of real estate (e.g., Uniform Appraisal Standards for Federal Land Acquisitions). Impacts to wind turbines will be avoided to the extent practicable by shifting the alignment of the RDP. The request for a meeting was forwarded to HCDD1. Additional coordination regarding the right-of-way needed for project completion will be conducted following the authorization of the project in accordance with Federal and State requirements.	San Perlita	In-Person
General Project	Norma Llanes	Improvements are always good for the drainage projects.	Comment acknowledged.	---	Facebook Comment

Raymondville Drain Project
Community Outreach Pop-Up Meetings

Hidalgo County Drainage District No. 1 (HCDD1) is developing a proposed project to improve the existing regional storm water drainage system in Hidalgo and Willacy Counties, Texas. This proposed drainage system improvement project, known as the Raymondville Drain Project (RDP), would expand the existing Raymondville Drain, in length and width, and potentially construct new drainage system elements (i.e., detention basins, alternative conveyance channels, etc.) to provide flood mitigation benefits within low-lying areas of Hidalgo and Willacy Counties. The RDP would be designed as a modern drainage system to provide additional regional drainage capacity in flood-prone and poorly drained areas, reduce flood-related damage to residential, commercial and agricultural areas (particularly following significant rainfall or storm events), and support economic development opportunities in urban and rural areas within Hidalgo and Willacy Counties. This notice advises the public that HCDD1 will be conducting a series of community outreach events (also known as pop-up meetings) to convey information on the proposed drainage system improvement project and solicit comments on the proposed project from the public.

The community outreach pop-up meetings will be held as follows:

- Tuesday, July 25, 2023, 4:00-6:00 pm, St. Patrick's Catholic Church, 11833 FM 1015, Lasara, TX 78561
- Wednesday, July 26, 2023, 11:00am-1:00 pm, Sgt. Jacob de la Garza Park North, 1059 Cullen St, Edinburg, TX 78541.
- Wednesday, July 26, 2023, 4:00-6:00 pm, At the Southeast Corner of the Intersection of FM 490 and FM 493 (Across the Street from P&L Service Grocery and Convenience Store), Hargill, TX 78549
- Thursday, July 27, 2023, 11:00 am-1:00 pm, R2 Country Store, 14310 9th Avenue, San Perlita, TX 78590
- Thursday, July 27, 2023, 4:00-6:00 pm, Veterans Park, 901 W. Durango Avenue, Raymondville, TX 78580

Each of the five (5) community outreach pop-up meetings will be two hours in length and will consist of an open forum that will allow attendees to arrive and depart the outreach event at their convenience. Attendees will be able to review project materials (informational displays, maps, etc.), ask questions of the outreach team, and provide written or verbal comments on the proposed project. Comment forms (written in English and Spanish) will be available at each community outreach event.

Written comments may be submitted by mail to RRP Consulting Engineers, 5408 North 10th Street, McAllen, TX 78504. Written comments may also be submitted by email to HCDD1RDP@rrpeng.com. All comments must be received on or before Tuesday, August 15, 2023. Responses to comments received at the community outreach events will be incorporated into the engineering and/or environmental documentation for the proposed project.

Outreach team members will speak English and Spanish. If you are a person with a disability who requires assistance or an accommodation to attend and participate in the community outreach pop-up meetings, please contact Ms. Mirna Sanchez at 956.926.5000 no later than 12:00 pm (noon) on Friday, July 21, 2023. Please be aware that advance notice is required as some services, accommodations, and special arrangements may require time to prepare.

Proyecto de Drenaje de Raymondville

Reunión Emergente de (Pop-Up) Alcance Comunitario

El Distrito de Drenaje No. 1 del Condado de Hidalgo (HCDD1) está desarrollando un proyecto propuesto para mejorar el sistema regional de drenaje de aguas pluviales existente en los condados de Hidalgo y Willacy, Texas. Este proyecto de mejora del sistema de drenaje propuesto, conocido como Proyecto de drenaje de Raymondville (RDP), ampliaría el drenaje de Raymondville existente, en longitud y anchura, y posiblemente construiría nuevos elementos del sistema de drenaje (es decir, cuencas de detención, canales de transporte alternativos, etc.) para proporcionar beneficios de mitigación de inundaciones en áreas bajas de los condados de Hidalgo y Willacy. El RDP se diseñaría como un sistema de drenaje moderno para proporcionar capacidad de drenaje regional adicional en áreas propensas a inundaciones y con drenaje deficiente, reducir los daños relacionados con inundaciones en áreas residenciales, comerciales y agrícolas (particularmente después de lluvias o tormentas significativas) y apoyar la economía, oportunidades de desarrollo en áreas urbanas y rurales dentro de los condados de Hidalgo y Willacy. Este aviso informa al público que HCDD1 llevará a cabo una serie de eventos comunitarios (también conocidos como reuniones emergentes) para transmitir información sobre el proyecto de mejora del sistema de drenaje propuesto y solicitar comentarios sobre el proyecto propuesto del público.

Las reuniones emergentes de alcance comunitario se llevarán a cabo de la siguiente manera:

- Martes, 25 de Julio, 2023, 4:00-6:00 pm, St. Patrick's Catholic Church, 11833 FM 1015, Lasara, Texas 78561
- Miércoles, 26 de Julio, 2023, 11:00am-1:00 pm, Sgt. Jacob de la Garza Park North, 1059 Cullen St, Edinburg, TX 78541.
- Miércoles, 26 de Julio, 2023, 4:00-6:00 pm, En la esquina sureste de la intersección de FM 490 y FM 493 (al otro lado de la calle de P&L Service Grocery and Convenience Store), Hargill, TX 78549
- Jueves, 27 de Julio, 2023, 11:00 am-1:00 pm, R2 Country Store, 13310 9th Avenue, San Perlita, TX 78590
- Jueves, 27 de Julio, 2023, 4:00-6:00 pm, Veterans Park, 901 W Durango Ave, Raymondville, TX 78580

Cada una de las cinco (5) reuniones emergentes de alcance comunitario tendrá una duración de dos horas y consistirá en un foro abierto que permitirá a los asistentes llegar y salir del evento de alcance comunitario a su conveniencia. Los asistentes podrán revisar los materiales del proyecto (muestras informativas, mapas, etc.), hacer preguntas al equipo de extensión y proporcionar comentarios escritos o verbales sobre el proyecto propuesto. Los formularios de comentarios (escritos en inglés y español) estarán disponibles en cada evento comunitario.

Los comentarios escritos pueden enviarse por correo a RRP Consulting Engineers, 5408 North 10th St, McAllen, TX 78504. Los comentarios escritos también pueden enviarse por correo electrónico a HCDD1RDP@rrpeng.com. Todos los comentarios deben recibirse el viernes 11 de Agosto de 2023 o antes. Las respuestas a los comentarios recibidos en los eventos de se incorporarán a la documentación de ingeniería y/o ambiental para el proyecto propuesto.

Los miembros del equipo de extensión hablarán inglés y español. Si usted es una persona con una discapacidad que requiere asistencia o adaptaciones para asistir y participar en las reuniones, comuníquese con la Sra. Mirna Sánchez al 956-926-5000 a más tardar a las 12:00 p.m. (mediodía) el Viernes, 21 de Julio de 2023. Tenga en cuenta que se requiere notificación previa ya que algunos servicios, alojamientos y arreglos especiales pueden requerir tiempo para prepararse.

Mirna Sánchez al **956-926-5000** a más tardar a las 12:00 p. m. (mediodía) el Viernes, 21 de julio de 2023. Tenga en cuenta que se requiere notificación previa ya que algunos servicios, alojamientos y arreglos especiales pueden requerir tiempo para prepararse.

The Possum Cop Chronicles

10-95 with the meat - Part 2

By *Jon Brauchle*

They turned east on the county road and could see the vehicle continuing to swing a spotlight from side to side about 100 yards in front of them. Windows down, Jonny and Bruce followed. Each time the vehicle stopped, the wardens stopped and listened for a shot. The only thing they heard was the howling north wind. “Nothing’s gonna be out in this wind,” Bruce lamented.

After about a mile, the vehicle turned right and headed out toward the main highway, continuing to spotlight as they went. As they neared the highway intersection, the spotlighting stopped. Jonny and Bruce heard not a shot, one, the whole time. “Let’s stop them and chalk it up to bunny hunting, I guess,” Jonny said. He sped up to close the distance before flipping on the lights.

The driver pulled the vehicle over on the shoulder of the highway next to a plowed field. Jonny called in the license plate of an older-model, compact Toyota sedan, and the two wardens got out and ap-

proached the suspect vehicle, Jonny on the driver’s side and Bruce on the passenger’s side.

There were five men in the vehicle, two in the front and three in the back, and none of them were sitting still. Jonny got the driver’s license and told the two men in the front seat to place their hands on the dash and leave them there until told to do otherwise. Jonny and Bruce then opened the back doors and removed the three men in the back seat from the vehicle and discovered a Mary Poppins-esque cache of plunder. Stashed under their legs on the floorboard were a .22 magnum rifle, a yearling doe, and a raccoon.

The passenger in the front seat was nervous. He couldn’t keep his hands on the dashboard, and he kept fidgeting with the glove box. Bruce removed him from the car, opened the glove box, and found a big ‘ol bag of weed inside. Bruce put the man against the car and patted him down. As Bruce reached for his handcuffs to hook the dude up, the man broke free and started running into the plowed field.

Like a dog after a squirrel, Jonny took off after the runner and ran just as fast as his polished-up honkytonkin’ boots would allow in the disced-up dirt. Jonny couldn’t get any closer than about 10 yards before the runner would look back, grimace in fear, and hit a new gear. After about 200

yards, Jonny realized that he had left Bruce alone on the side of the road with the other four dudes, the hippy lettuce, the doe, the raccoon and probably a partridge in a pear tree somewhere, too. Reluctantly, he turned back.

Bruce had called for backup and had everything under control when Jonny returned. It wasn’t long at all before county deputies arrived and started scouring the area for the runner. They found him hiding in a drainage ditch about 20 yards away from where Jonny quit giving chase.

All five men in the vehicle were arrested and taken to jail. The little sedan they were in was towed, the .22 mag was seized, and the doe and the raccoon were thrown in the back of Jonny’s patrol car to be donated to a needy family, person, or persons. The deer would be easier to donate than the racoon, for sure.

But the best part of it all came after the violators were cuffed and ready for transport. At long last, the fish-wardens had more to show for a night’s work than a few bunny-hunting tickets. Jonny stuck out his chest, picked up the mic to his state radio, keyed it and said, “10-95, five times with the meat!”

Jon Brauchle is a retired Texas Game Warden currently working on a book about game wardens and the people who did their best to avoid them.

RAYMONDVILLE POLICE BLOTTER

JULY 17 - Arrested: Ricky Ramirez, execution of warrants x2, murder 1st degree felony, engaging in organized criminal activity, 1st degree.

Raymondville Drain Project

Community Outreach Pop-Up Meetings

Hidalgo County Drainage District No. 1 (HCDD1) is developing a proposed project to improve the existing regional storm water drainage system in Hidalgo and Willacy Counties, Texas. This proposed drainage system improvement project, known as the Raymondville Drain Project (RDP), would expand the existing Raymondville Drain, in length and width, and potentially construct new drainage system elements (i.e., detention basins, alternative conveyance channels, etc.) to provide flood mitigation benefits within low-lying areas of Hidalgo and Willacy Counties. The RDP would be designed as a modern drainage system to provide additional regional drainage capacity in flood-prone and poorly drained areas, reduce flood-related damage to residential, commercial and agricultural areas (particularly following significant rainfall or storm events), and support economic development opportunities in urban and rural areas within Hidalgo and Willacy Counties. This notice advises the public that HCDD1 will be conducting a series of community outreach events (also known as pop-up meetings) to convey information on the proposed drainage system improvement project and solicit comments on the proposed project from the public.

The community outreach pop-up meetings will be held as follows:

- Tuesday, July 25, 2023, 4:00-6:00 pm, St. Patrick’s Catholic Church, 11833 FM 1015, Lasara, TX 78561
- Wednesday, July 26, 2023, 11:00am-1:00 pm, Sgt. Jacob de la Garza Park North, 1059 Cullen St, Edinburg, TX 78541.
- Wednesday, July 26, 2023, 4:00-6:00 pm, At the Southeast Corner of the Intersection of FM 490 and FM 493 (Across the Street from P&L Service Grocery and Convenience Store), Hargill, TX 78549
- Thursday, July 27, 2023, 11:00 am-1:00 pm, R2 Country Store, 14310 9th Avenue, San Perlita, TX 78590
- Thursday, July 27, 2023, 4:00-6:00 pm, Veterans Park, 901 W. Durango Avenue, Raymondville, TX 78580

Each of the five (5) community outreach pop-up meetings will be two hours in length and will consist of an open forum that will allow attendees to arrive and depart the outreach event at their convenience. Attendees will be able to review project materials (informational displays, maps, etc.), ask questions of the outreach team, and provide written or verbal comments on the proposed project. Comment forms (written in English and Spanish) will be available at each community outreach event.

Written comments may be submitted by mail to RRP Consulting Engineers, 5408 North 10th Street, McAllen, TX 78504. Written comments may also be submitted by email to HCDD1RDP@rrpeng.com. All comments must be received on or before Tuesday, August 15, 2023. Responses to comments received at the community outreach events will be incorporated into the engineering and/or environmental documentation for the proposed project.

Outreach team members will speak English and Spanish. If you are a person with a disability who requires assistance or an accommodation to attend and participate in the community outreach pop-up meetings, please contact Ms. Mirna Sanchez at 956.926.5000 no later than 12:00 pm (noon) on Friday, July 21, 2023. Please be aware that advance notice is required as some services, accommodations, and special arrangements may require time to prepare.

Proyecto de Drenaje de Raymondville

Reunión Emergente de (Pop-Up) Alcance Comunitario

El Distrito de Drenaje No. 1 del Condado de Hidalgo (HCDD1) está desarrollando un proyecto propuesto para mejorar el sistema regional de drenaje de aguas pluviales existente en los condados de Hidalgo y Willacy, Texas. Este proyecto de mejora del sistema de drenaje propuesto, conocido como Proyecto de drenaje de Raymondville (RDP), ampliaría el drenaje de Raymondville existente, en longitud y anchura, y posiblemente construiría nuevos elementos del sistema de drenaje (es decir, cuencas de detención, canales de transporte alternativos, etc.) para proporcionar beneficios de mitigación de inundaciones en áreas bajas de los condados de Hidalgo y Willacy. El RDP se diseñaría como un sistema de drenaje moderno para proporcionar capacidad de drenaje regional adicional en áreas propensas a inundaciones y con drenaje deficiente, reducir los daños relacionados con inundaciones en áreas residenciales, comerciales y agrícolas (particularmente después de lluvias o tormentas significativas) y apoyar la economía. oportunidades de desarrollo en áreas urbanas y rurales dentro de los condados de Hidalgo y Willacy. Este aviso informa al público que HCDD1 llevará a cabo una serie de eventos comunitarios (también conocidos como reuniones emergentes) para transmitir información sobre el proyecto de mejora del sistema de drenaje propuesto y solicitar comentarios sobre el proyecto propuesto del público.

Las reuniones emergentes de alcance comunitario se llevarán a cabo de la siguiente manera:

- Martes, 25 de Julio, 2023, 4:00-6:00 pm, St. Patrick’s Catholic Church, 11833 FM 1015, Lasara, Texas 78561
- Miércoles, 26 de Julio, 2023, 11:00am-1:00 pm, Sgt. Jacob de la Garza Park North, 1059 Cullen St, Edinburg, TX 78541.
- Miércoles, 26 de Julio, 2023, 4:00-6:00 pm, En la esquina sureste de la intersección de FM 490 y FM 493 (al otro lado de la calle de P&L Service Grocery and Convenience Store), Hargill, TX 78549
- Jueves, 27 de Julio, 2023, 11:00 am-1:00 pm, R2 Country Store, 13310 9th Avenue, San Perlita, TX 78590
- Jueves, 27 de Julio, 2023, 4:00-6:00 pm, Veterans Park, 901 W Durango Ave, Raymondville, TX 78580

Cada una de las cinco (5) reuniones emergentes de alcance comunitario tendrá una duración de dos horas y consistirá en un foro abierto que permitirá a los asistentes llegar y salir del evento de alcance comunitario a su conveniencia. Los asistentes podrán revisar los materiales del proyecto (muestras informativas, mapas, etc.), hacer preguntas al equipo de extensión y proporcionar comentarios escritos o verbales sobre el proyecto propuesto. Los formularios de comentarios (escritos en inglés y español) estarán disponibles en cada evento comunitario.

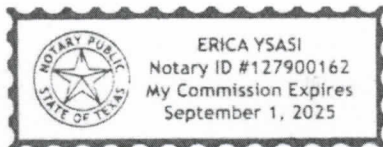

Los comentarios escritos pueden enviarse por correo a RRP Consulting Engineers, 5408 North 10th St, McAllen, TX 78504. Los comentarios escritos también pueden enviarse por correo electrónico a HCDD1RDP@rrpeng.com. Todos los comentarios deben recibirse el viernes 11 de Agosto de 2023 o antes. Las respuestas a los comentarios recibidos en los eventos de se incorporarán a la documentación de ingeniería y/o ambiental para el proyecto propuesto.

Los miembros del equipo de extensión hablarán inglés y español. Si usted es una persona con una discapacidad que requiere asistencia o adaptaciones para asistir y participar en las reuniones, comuníquese con la Sra. Mirna Sánchez al 956-926-5000 a más tardar a las 12:00 p.m. (mediodía) el Viernes, 21 de Julio de 2023. Tenga en cuenta que se requiere notificación previa ya que algunos servicios, alojamientos y arreglos especiales pueden requerir tiempo para prepararse.

Join us at Sgt. Jacob de la Garza Park in Edinburg on July 26 from 11am to 1pm! 📅 Hidalgo County Drainage District No. 1 is excited to share updates on the Raymondville Drain Project (RDP). 🏞️ This proposed project aims to enhance the regional stormwater drainage system in Hidalgo and Willacy Counties, expanding the Raymondville Drain in length and width and potentially constructing new elements for flood mitigation in low-lying areas. Don't miss this chance to learn more about the RDP and how it will benefit our communities! ✨ 🙌

Thursday, 7/27/2023: 4-6pm
Veterans Park
901 W. Durango Avenue,
Raymondville, TX 78580

PROJECT PURPOSE AND NEED:

Hidalgo County Drainage District No. 1 (HCCDD) is developing a proposed project to improve the existing regional storm water drainage system in Hidalgo and Willacy Counties, Texas. This project, known as the Raymondville Drain Project (RDP), would expand the existing Raymondville Drain, in length and width, and potentially construct new drainage system elements (i.e., detention basins, alternative conveyance channels, etc.) to provide flood mitigation benefits within low-lying areas of Hidalgo and Willacy Counties. The RDP would be designed as a modern drainage system to provide additional regional drainage capacity in flood-prone and poorly drained areas, reduce flood-related damage to residential, commercial, and agricultural areas, and support economic development opportunities in urban and rural areas. This notice advises the public that HCCDD will be conducting a series of community outreach events to convey information on the proposed project to the public.

POP-UP DETAILS:

Each of the five (5) community outreach pop-up meetings will be two hours in length and will consist of an open forum that will allow attendees to arrive and depart at their convenience. Attendees will be able to review project materials (informational displays, maps, etc.), ask questions of the outreach team, and provide written or verbal comments on the proposed project.

COMMENTS:

Written comments may be submitted by mail to **RRP Consulting Engineers, 5408 North 10th St, McAllen, TX 78504**. Written comments may also be submitted by email to **HCCDD@RRPconsulting.com**. All comments must be received on or before Tuesday, August 15, 2023. Responses to comments received at the community outreach events will be incorporated into the engineering and/or

Jueves, 7/27/2023: 4-6pm
Veterans Park
901 W. Durango Avenue,
Raymondville, TX 78580

PROPÓSITO Y NECESIDAD DEL PROYECTO:

El Distrito de Drenaje No. 1 del Condado de Hidalgo (HCCDD) está desarrollando un proyecto propuesto para mejorar el sistema regional de drenaje de aguas pluviales existente en los condados de Hidalgo y Willacy, Texas. Este proyecto, conocido como Proyecto de drenaje de Raymondville (RDP), ampliará el drenaje de Raymondville existente, en longitud y anchura, y posiblemente construirá nuevos elementos del sistema de drenaje (es decir, cuencos de detención, canales de transporte alternativos, etc.) para proporcionar beneficios de mitigación de inundaciones dentro de áreas bajas de los condados de Hidalgo y Willacy. El RDP sería un sistema de drenaje moderno para brindar capacidad de drenaje regional adicional en áreas propensas a inundaciones y con drenaje deficiente, reducir los daños relacionados con inundaciones en áreas residenciales, comerciales y agrícolas, y respaldaría oportunidades de desarrollo económico en áreas urbanas y rurales. Este aviso informa al público que HCCDD llevará a cabo una serie de eventos comunitarios (también conocidos como reuniones emergentes) para transmitir información sobre el proyecto propuesto al público.

DETALLES DE POP-UP:

Cada una de las cinco (5) reuniones emergentes de alcance comunitario tendrá una duración de dos horas y consistirá en un foro abierto que permitirá a los asistentes llegar y partir a su conveniencia. Los asistentes podrán revisar los materiales del proyecto (muestras informativas, mapas, etc.), hacer preguntas al equipo de extensión y proporcionar comentarios escritos o verbales sobre el proyecto.

COMENTARIOS:

Los comentarios escritos pueden enviarse por correo a **RRP Consulting Engineers, 5408 North 10th St, McAllen, TX 78504**. Los comentarios escritos también pueden enviarse por correo electrónico a **HCCDD@RRPconsulting.com**. Todos los comentarios deben recibirse el martes 15 de agosto de 2023 o antes. - Easements need to be paid at the same price as you are paying in Hidalgo County

- What are we doing about the wind turbines? You are just going to move them onto someone else's property that don't want them.

Raymondville, TX 78580

PROJECT PURPOSE AND NEED:
Hidalgo County Drainage District No. 1 (HCCDD) is developing a proposed project to improve the existing regional storm water drainage system in Hidalgo and Wilbrey Counties, Texas. This project, known as the Raymondville Drain Project (RDP), would expand the existing Raymondville Drain, in length and width, and potentially construct new drainage system elements (i.e., detention basins, alternative conveyance elements, etc.) to provide flood mitigation benefits within existing areas of Hidalgo and Wilbrey Counties. The RDP would be designed as a modern drainage system to provide additional regional drainage capacity in flood-prone and poorly drained areas, reduce flood-related damage to residential, commercial, and agricultural areas, and support economic development opportunities in urban and rural areas. This notice advises the public that HCCDD will be conducting a series of community outreach events to convey information on the proposed project to the public.

POP-UP DETAILS:

Each of the five (5) community outreach pop-up meetings will be two hours in length and will consist of an open house that will allow attendees to arrive and depart at their convenience. Attendees will be able to review project materials (informational displays, maps, etc.), ask questions of the outreach team, and provide written or

COMMENTS:

Written comments may be submitted by email to RRP Consulting Engineers, 3408 North 10th St, McAllen, TX 78504. Written comments may also be submitted by email to HCCDD@rrpengineers.com. All comments must be received on or before Tuesday, August 15, 2023. Responses to comments received at the community outreach events will be

PROPÓSITO Y NECESIDAD DEL PROYECTO:
El Distrito de Drenaje No. 1 del Condado de Hidalgo (HCCDD) está desarrollando un proyecto propuesto para mejorar el sistema regional de drenaje de aguas pluviales existente en los condados de Hidalgo y Wilbrey, Texas. Este proyecto, conocido como Proyecto de drenaje de Raymondville (RDP), ampliará el drenaje de Raymondville existente, en longitud y anchura, y posiblemente construya nuevos elementos del sistema de drenaje (es decir, basculas de detención, canales de transporte alternativos, etc.) para proporcionar beneficios de mitigación de inundaciones dentro de áreas bajas de los condados de Hidalgo y Wilbrey. El RDP sería un sistema de drenaje moderno para brindar capacidad de drenaje regional adicional en áreas urbanas y rurales, reducir los daños relacionados con inundaciones en áreas residenciales, comerciales y agrícolas, y respaldar oportunidades de desarrollo económico en áreas urbanas y rurales. Este aviso informa a públicos que HCCDD llevará a cabo una serie de eventos comunitarios (también conocidos como reuniones emergentes) para transmitir información sobre el proyecto propuesto al público.

DETALLES DE POP-UP:

Cada una de las cinco (5) reuniones emergentes de alcance comunitario tendrá una duración de dos horas y consistirá en un hogar abierto que permitirá a los asistentes llegar y partir a su conveniencia. Los asistentes podrán revisar los materiales del proyecto (muestras informativas, mapas, etc.), hacer preguntas al equipo de extensión y proporcionar

EXHIBIT BOARDS

Raymondville Drain Project

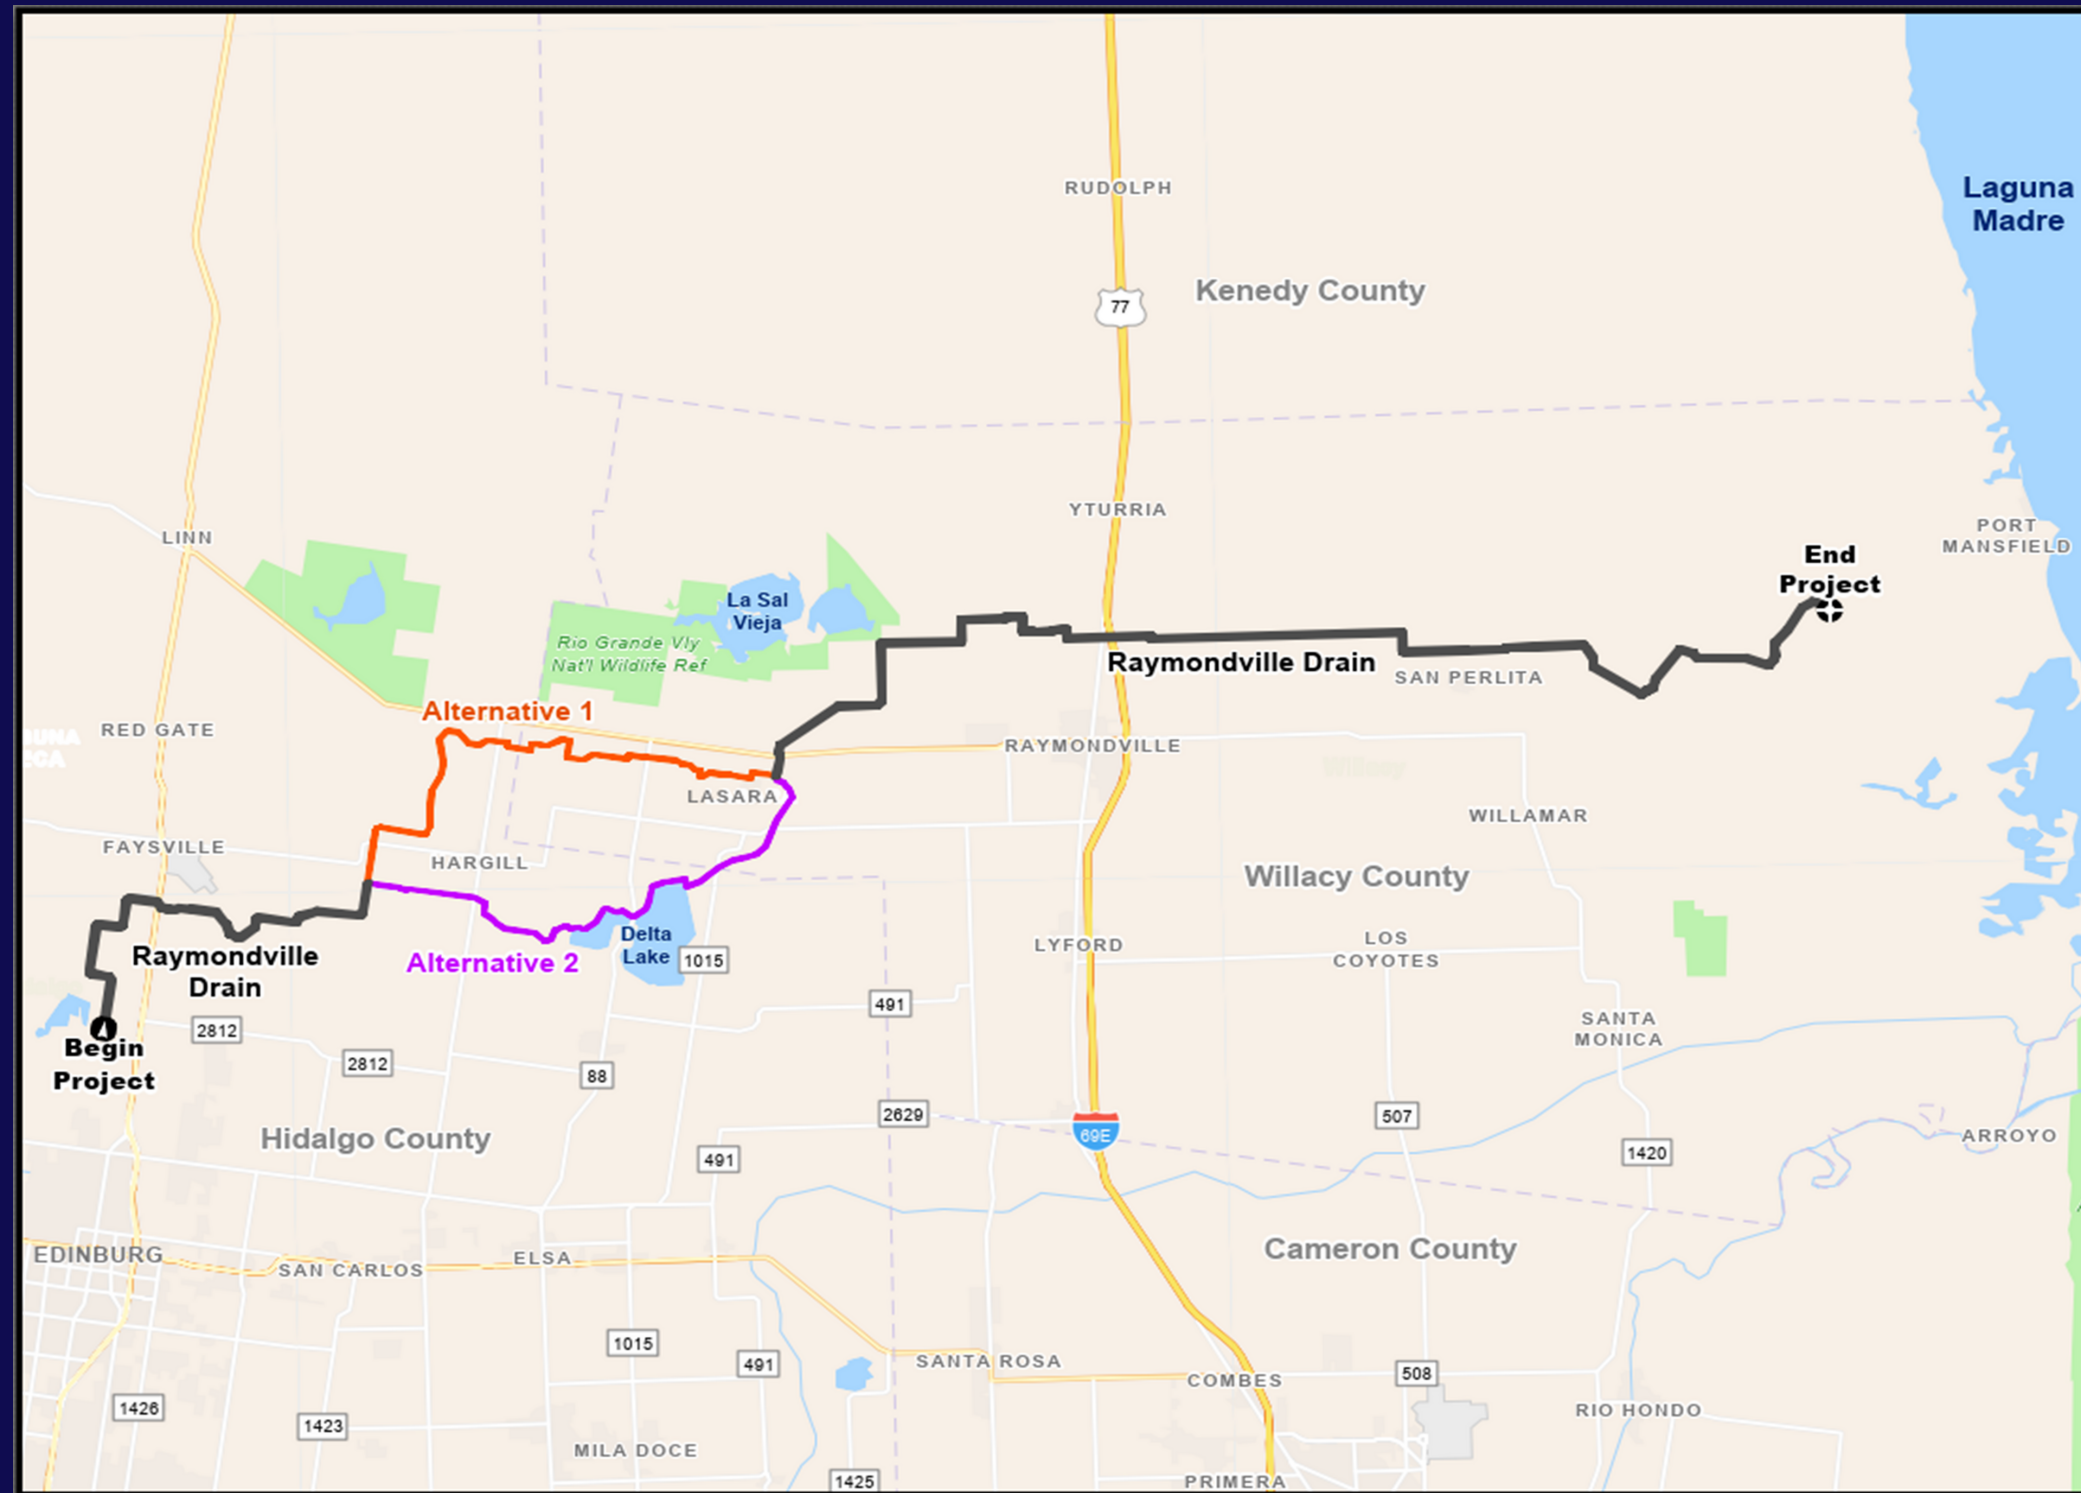

Project Need:

- The Raymondville Drain Project (RDP) would be designed as a modern drainage system to provide additional regional drainage capacity in flood-prone and poorly drained areas, reduce flood-related damage to residential, commercial, and agricultural areas, and support economic development opportunities in urban and rural areas.

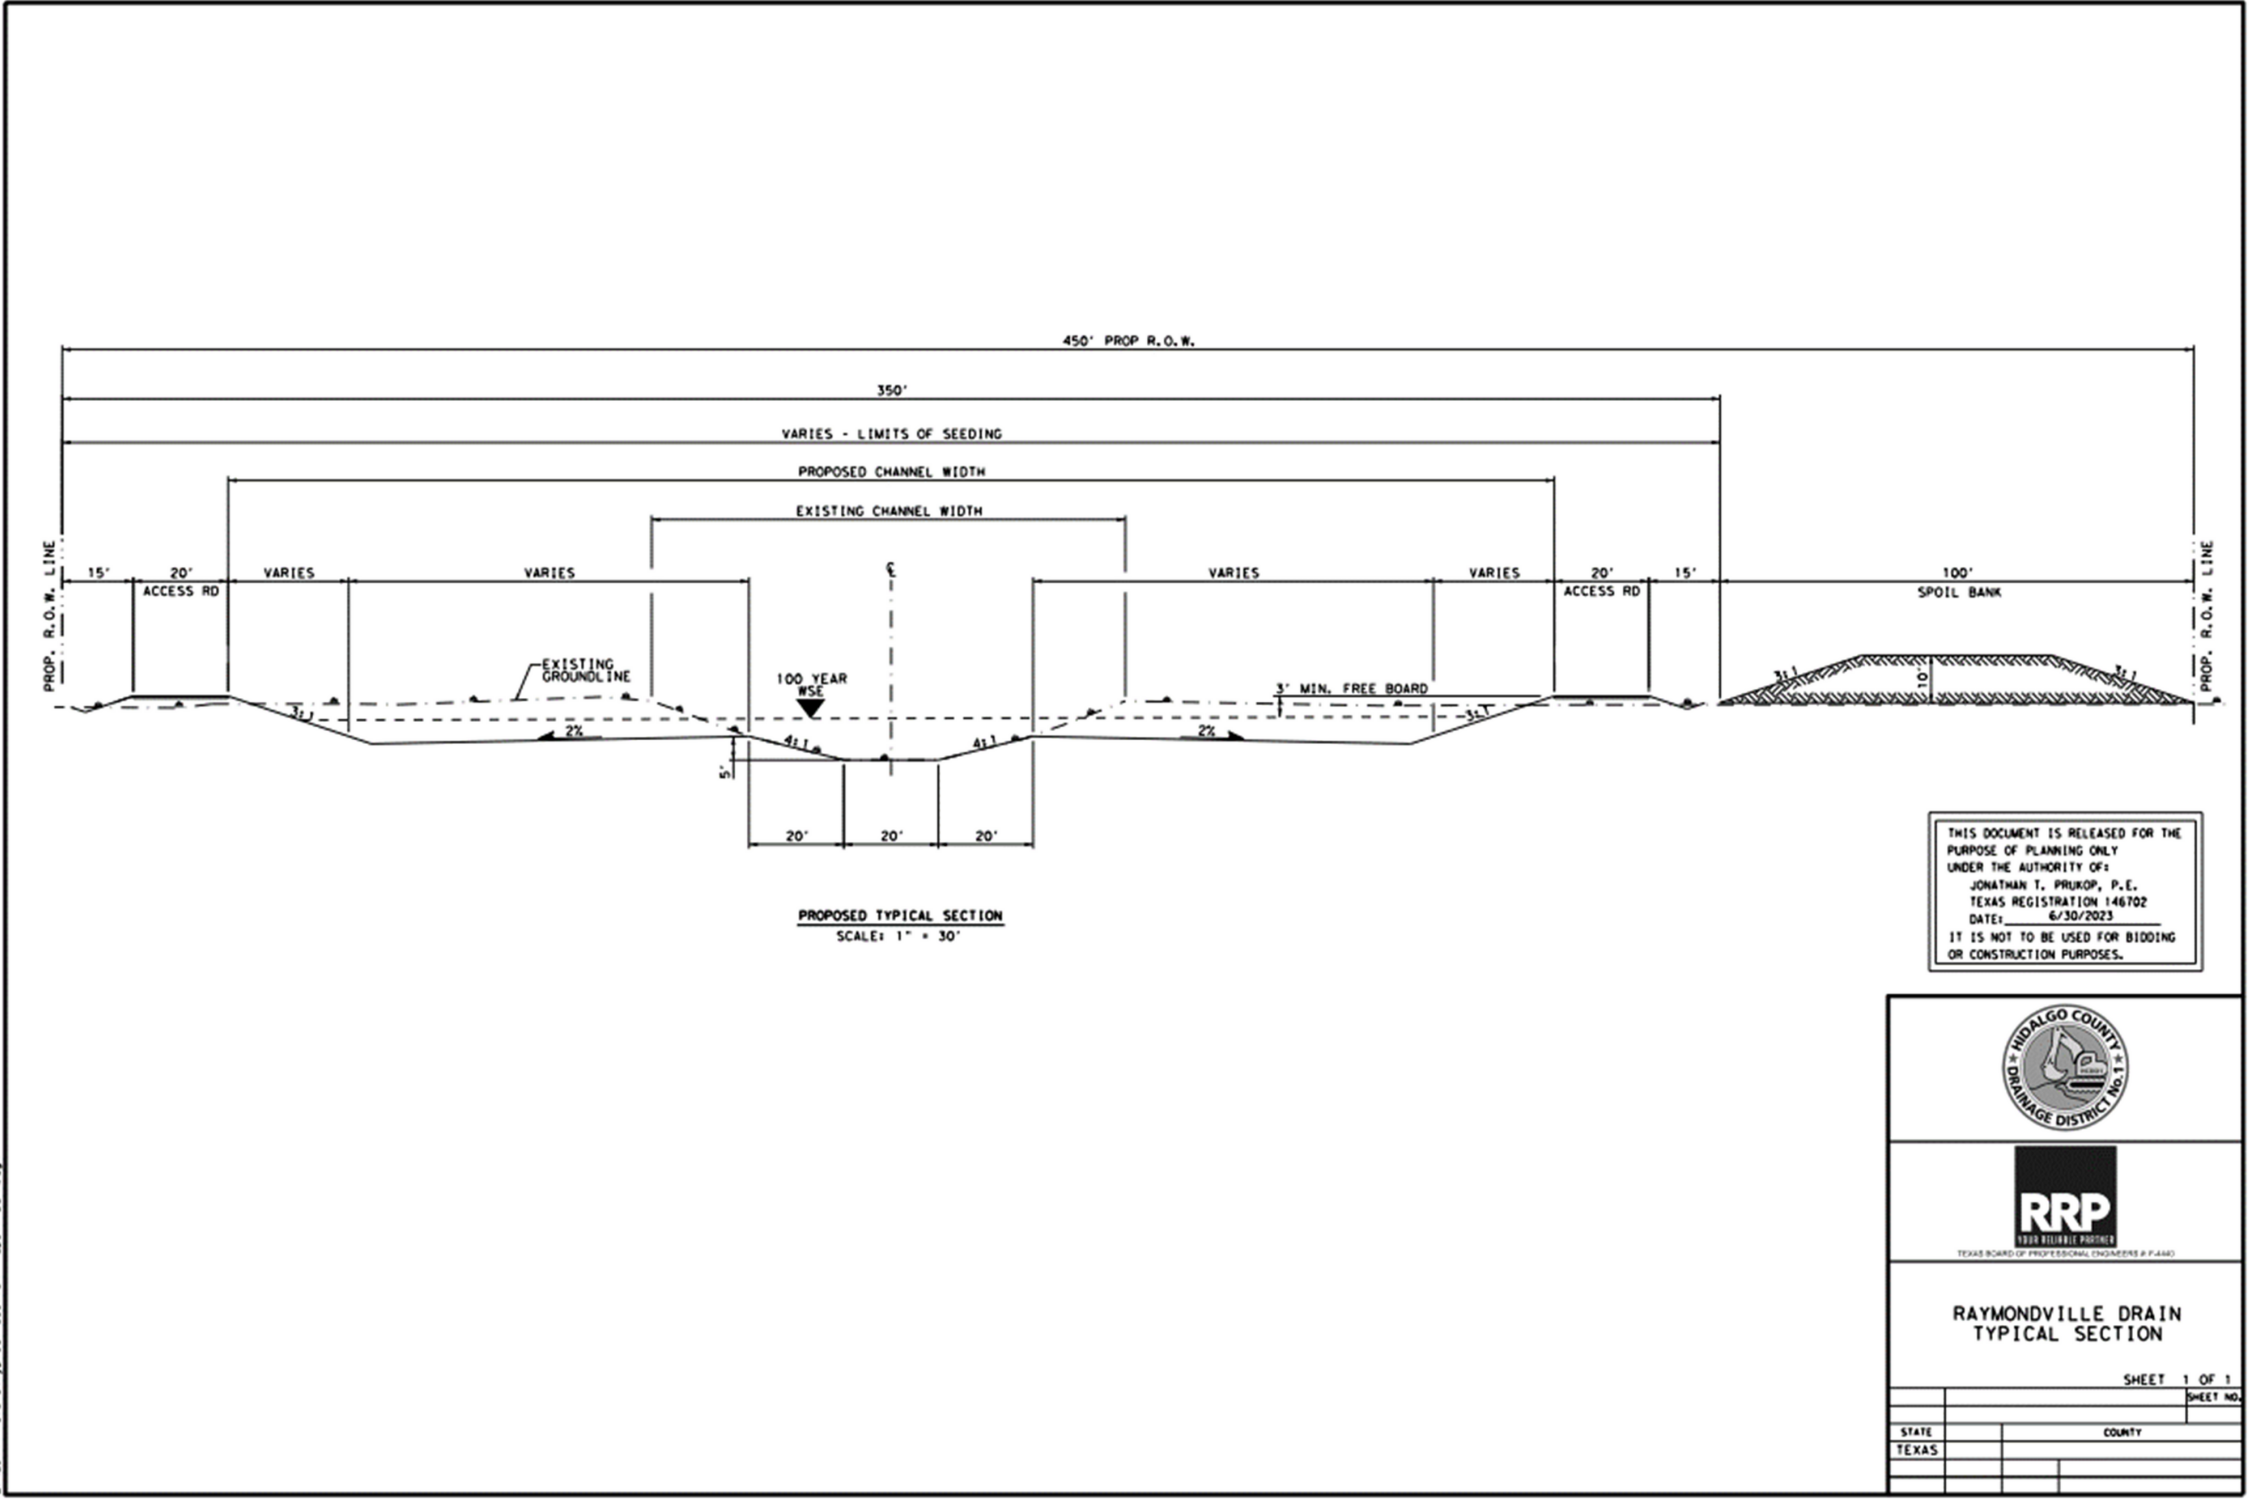

Project Purpose:

- The purpose of the RDP is to determine a technically feasible, environmentally sensitive, socially acceptable, and economically justified plan to manage flood damage risk while supporting regional economic and community resilience.
- The RDP would provide economic development opportunities by reducing floodplain areas and increasing the availability of farmland and other developable land.
- The RDP would add potential new storage channels, ditches, and pond facilities and widen selected existing channels and ditches.

Raymondville Drain Project

Raymondville Drain Project

Proyecto de drenaje de Raymondville

Necesidad y Propósito

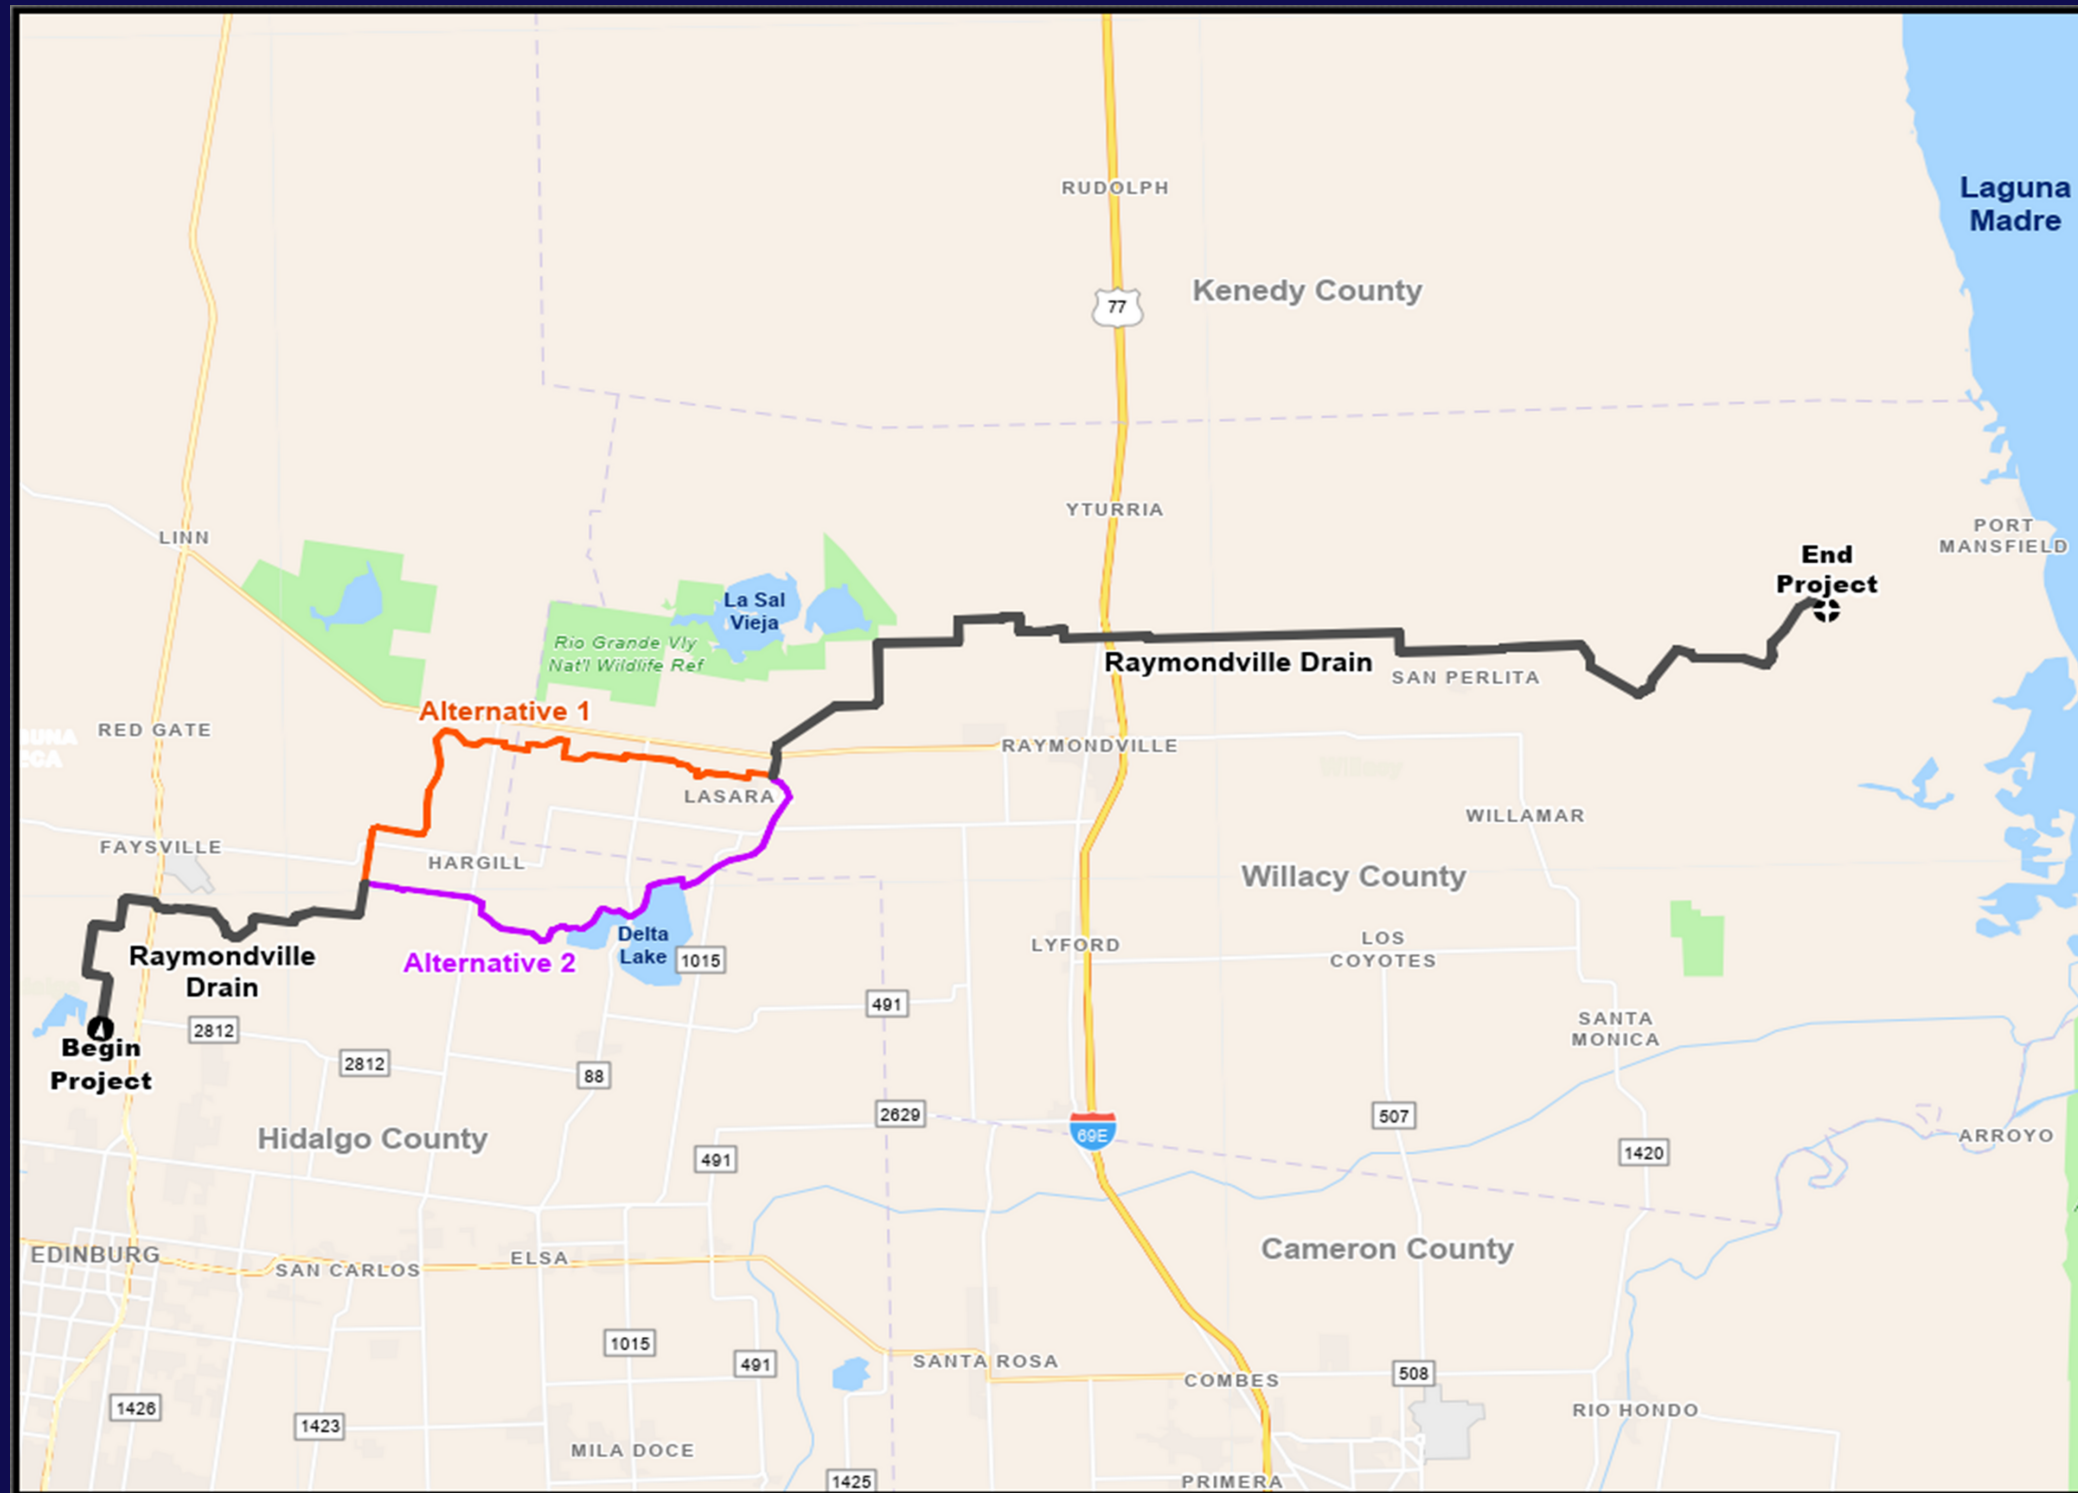

Necesidad del proyecto:

- El Proyecto de Drenaje de Raymondville (RDP) se diseñaría como un sistema de drenaje moderno para brindar capacidad de drenaje regional adicional en áreas propensas a inundaciones y con drenaje deficiente, reducir los daños relacionados con inundaciones en áreas residenciales, comerciales y agrícolas, y apoyar oportunidades de desarrollo económico en zonas urbanas y rurales.

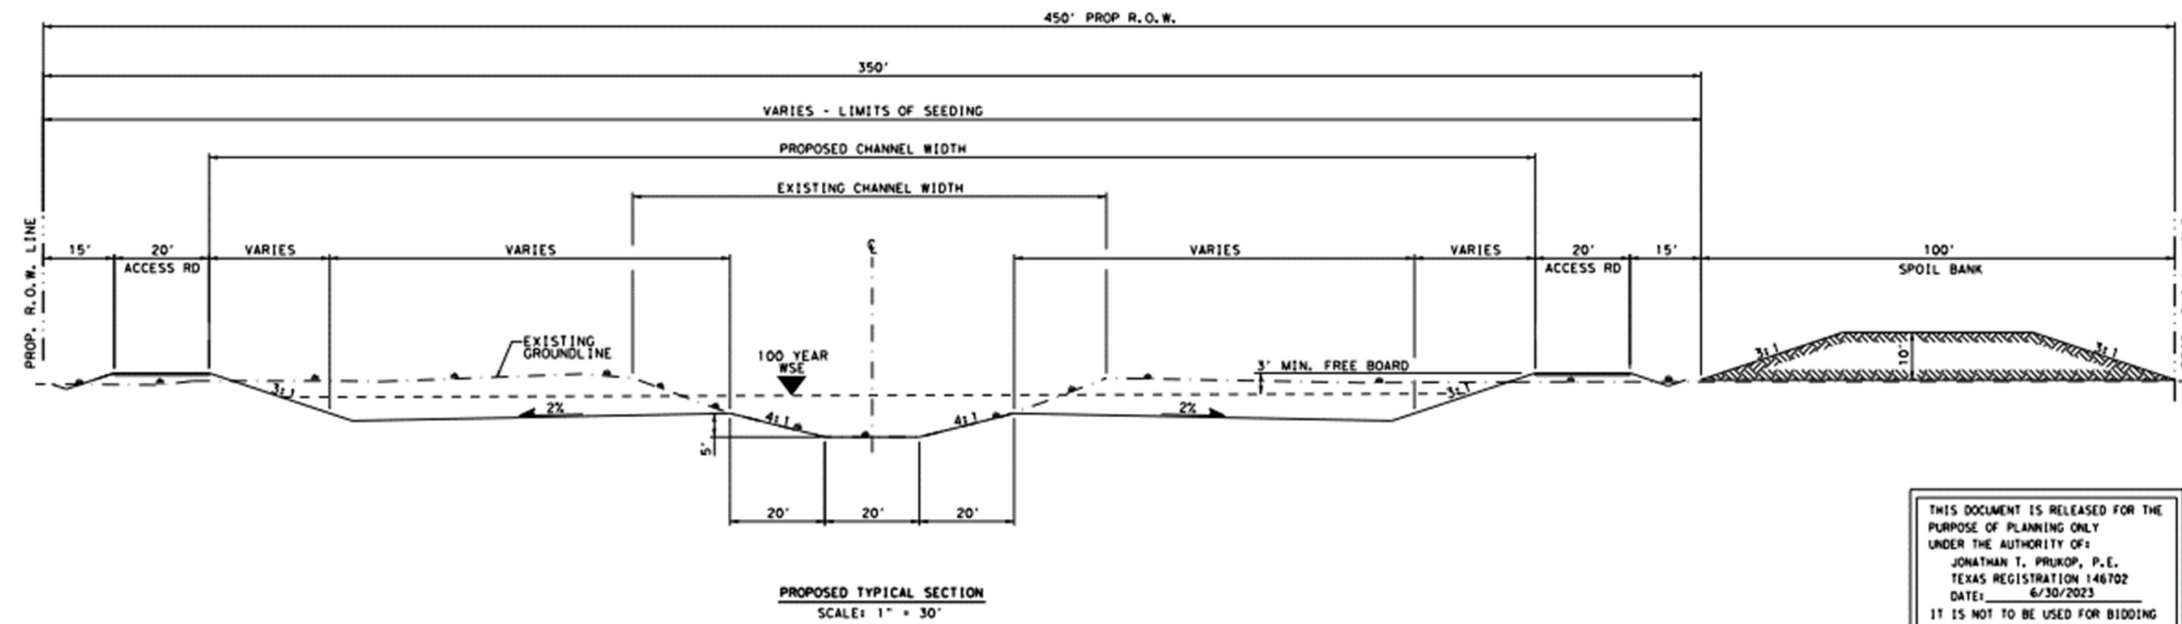

Propósito del proyecto:

- El propósito del RDP es determinar un plan técnicamente factible, ambientalmente sensible, socialmente aceptable y económicamente justificado para gestionar el riesgo de daños por inundación mientras apoya la resiliencia económica y comunitaria regional.
- El RDP brindaría oportunidades de desarrollo económico al reducir las áreas de llanuras aluviales y aumentar la disponibilidad de tierras de cultivo y otras tierras urbanizables.
- El RDP agregaría posibles nuevos canales de almacenamiento, zanjas e instalaciones de estanques y ampliaría los canales y zanjas existentes seleccionadas.

INFORMATION SHEET

RAYMONDVILLE DRAIN PROJECT INFORMATION SHEET

Project Overview:

Hidalgo County Drainage District No. 1 (HCDD1) is developing a proposed project to improve the existing regional storm water drainage system in Hidalgo and Willacy Counties, Texas. The following map shows the limits of the proposed project.

PROJECT ELEMENTS

- Expand the existing Raymondville Drain in length and width
- Design and construct new drainage system elements (i.e., detention basins, alternative conveyance channels, etc.), if needed
- Add regional drainage capacity in flood-prone/poorly drained areas

BENEFITS OF PROJECT

- Decrease storm-related flood damage in areas surrounding the proposed project
- Improve drainage capacity in areas of urban/suburban growth
- Support economic development opportunities in urban, suburban and/or rural areas
- Increase environmental resilience

PROYECTO DE DRENAJE DE RAYMONDVILLE

HOJA DE INFORMACIÓN

Descripción del proyecto:

El Distrito de Drenaje No. 1 del Condado de Hidalgo (HCDD1) está desarrollando un proyecto propuesto para mejorar el sistema regional de drenaje de aguas pluviales existente en los condados de Hidalgo y Willacy, Texas.

ELEMENTOS DEL PROYECTO

- Ampliar el drenaje de Raymondville existente de largo y ancho
- Diseñar y construir nuevos elementos del sistema de drenaje (es decir, cuencas de detención, canales de transporte alternativos, etc.), si es necesario
- Agregar capacidad de drenaje regional en áreas propensas a inundaciones o con drenaje deficiente

BENEFICIOS DEL PROYECTO

- Reducir los daños por inundaciones relacionados con tormentas en las áreas que rodean el proyecto propuesto
- Mejorar la capacidad de drenaje en áreas de crecimiento urbano/suburbano
- Apoyar oportunidades de desarrollo económico en áreas urbanas, suburbanos y rurales.
- Aumentar la resiliencia ambiental
